SKILLS

FrontEnd : HTML, CSS, Javascript , React , Redux , tailwindcss .

Backend : Node.js , Express.js , Django

Database, Cloud & AI: SQL, MongoDB , AWS(EC2 ,S3) , LangChain, Gemini API.

EXPERIENCE

Skoolofcode | Full Stack Software Engineer – remote

Feb 2025 – Present

- Sole engineer who **designed, built, and maintained Kenspark**, an AI-powered learning platform used daily by **80+ teachers and 200+ students**.
- Delivered **AI-driven assessments and learning workflows** using **LangChain**, improving content creation speed and teacher productivity.
- Owned **end-to-end feature development** across **React/Vite frontend, Django/Python backend, and AWS production deployment**, for skoolofcode and kenspark.
- **Led all frontend development** and UI design across Skoolofcode and Kenspark, building responsive, user-centric interfaces that improved accessibility and usability across mobile ,tablet and desktop devices for 280+ daily users.
- Led **feature ownership in production**, Owned full product lifecycle — architecture, development, bug fixes, performance optimisation, and production support as the single long-term maintainer for 99.9% system uptime.
- Collaborated directly with stakeholders to drive product adoption by creating **demo videos, feature announcements, and release notes**, bridging the gap between engineering and user experience.

PROJECTS

FreeFlow – video Streaming App | (React, Redux, Tailwind CSS, Node.js, MongoDB, YouTube API) Dec – 2024

A video streaming platform leveraging the YouTube API to render and manage video content.

- **Features**: Integrated the **YouTube API** to fetch and display videos dynamically. Built a seamless and responsive user interface using **React**, styled with **Tailwind CSS**.
- **Responsibilities**: Utilized **Redux** for state management to handle video data and user interactions efficiently. Designed key features such as video search, playback, and user-friendly navigation.

Food Ordering App | (React, Tailwind CSS, Node.js, Express.js, MongoDB, Swiggy Public API) Dec – 2024

A responsive web application for browsing restaurant menus and placing food orders.

- **Features**: Integrated Swiggy's public API to dynamically fetch and display restaurant menus. Designed a modern, responsive user interface using **React** and **Tailwind CSS**, with optimized performance through efficient data fetching and caching.
- **Responsibilities**: Developed reusable React components for menu listing, cart management, and order summary. Implemented intuitive navigation and search functionality to enhance user experience.

EDUCATION

Parvatibai Genba Moze College of Engineering - Pune.

Feb 2021 – Jun 2024

- Course : B.E in Computer Science and Engineering | 8.34 CGPA

Nowrosjee Wadia College of Arts ,commerce and Science -Pune.

Aug 2017 – May 2019

- Course : 11th and 12th Science | Passed with first class.

St. Francis De Sales Schools - Pune.

Jun 2003 – Mar 2017

- Course : SSC board till 10th | passed with Distinction.
